To: Federal Communications Commission

From: Restar Electronics Americas Inc

Date: October 14<sup>th</sup>, 2021

To whom it may concern,

Restar Electronics Americas Inc plans to market product in the United States that will use 60 GHz pulse radar, and therefore has a strong interest in the FCC adopting rules that will allow for these radar operations. Our products utilizing 60 GHz pulse radar are widely used in various industries such as automobiles and security cameras to agriculture and farming, increasing efficiency and safety of business operations and consumers in the USA.

Restar Electronics Americas Inc supports the proposals for new rules that were made by Acconeer in its comments filed in the proceeding (ET Docket No. 21-264).

It is important for the FCC to promote advances in new radar technologies by adopting rules that are flexible, consistent with the ETSI standards, and technologically neutral. This will allow manufacturers greater certainty in developing innovative radar technologies in a cost-effective manner.

Because of Restar Electronics Americas Inc's planned use of pulse radar technology, it is especially important that the Commission ensure that all types of radar systems are treated equally when considering the impact of proposed technical rules on their specific operations. The Commission should not inadvertently provide a competitive advantage to some parties by adopting rules that have varying consequences on different radar technologies.
